Scheme of childlike characteristics — m17

Inventor: xxxxx **Year: ~????**

Also some sort of Limbic System Vulnerability Hack, our brain is susceptible to the cute appearance of children and reminds us of our (happy) childhood with equal aged kids. This is "used" by advertising as well as by people like Epstein that possibly used the victims to get influence in politics, science... Scientifically spoken: It is about "Wahrnehmungs-psychologie", the shape of the head, which also reminds us of ourclassmate in our childhood. Sociopaths Ignorantly dont care about childrens future, if they can sell more junk they would even roast a child (maybe "only" with an active denial system of course) if they just can make more profit... this is a blue card with a kid, but the kids are the victims not those who abuse this principle.

Age Based Access Control — m72

Discretionary Access Control — Kernel
Once a security exploit gains access to privileged system component, the entire system is compromised.

Mandatory Access Control — Kernel
Kernel policy defines access to privileged system component, the
Mandatory policy defines application rights, firewalling applications from compromising the ...

Inventor: xxxxx **Year: ~????**

Normally CISSP books explain, that there are Mandatory and Discretionary Access Control Systems. Unfortunately the Person that implemented it for t1 card decided to give older People always more access rights than younger people. Older people can access the younger people even if they are naked or otherwise vulnerable, so the CIA creates Acceptance for the Global Surveillance Nightmare. This leads to (cyber-)rape, makes older people using younger boys as weapons and don't care about if they die, or would run amok during the "mission". Exactly those things led me to do things like m32 or m44 (but so she nows im still ture), if you look below the image in this or m32 card (.svg) then you would see, that there are some victims that are much more affected than i. The Access System should based on moral && intelligence, since a morraly intact intelligent person would not risk lives just to watch naked kids. See also m71 Card.

Communication scheme between patients in Mental Institutions — m144

Inventor: Satan **Year: ~????**

The communication between patient and patient or between patient and medic or the communication between patients and psychiatric nurses are often ambigious. In my opinion they (who) try that communication between patients will be poisoned (m50). I try to be unambiguously. But as soon as I use to complicated words they call me imaginary poser (maybe some stimulus reaction habit). Such cards would maybe help, but i guess they rendered "rage" on my cards... Hopefully at least the medic to medic link works!

Maybe TURBINE / TARMOIL like for Neuralink / Stimmoceiver? <- i dont think so, i guess it's noramlly the parental generation, but the parents are maybe driven by deep packet injection.

Multilane APP for Socio-Psychology things — m142

```

Aversions Archetyp

Näherungs Sensor ⇨ Stimoceiver ⇨ Amygdala Implantat

	INDIKATIV	KONJUNKTIV II
SINGULAR	ich glupsche / du glupschtest	ich glupschte / du glupschtest
	er/sie/es glupscht	er/sie/es glupschte
PLURAL	wir glupschen	wir glupschen
	sie glupschen	sie glupschen

Inventor: xxxxx **Year: ~????**
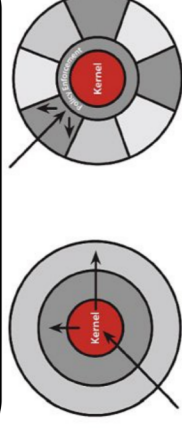

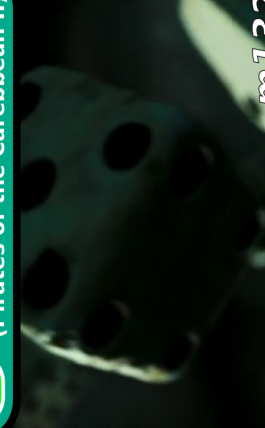

Gruppen von alten glupschenden Männern und Frauen, die in einem Schwarm-Algorithmus ein Maximum an Psychoterror verursachen und so das jüngere Opfer psychotisch machen. Diese Human-BOTs wären somit alle gut fernsteuerbar von Satans Terrornetzwerk. Für mich als 40 jährigen Mann ist das schon mühsam, wie schlimm muss das für eine junge Frau sein. Bekannte Personen wie z.B. Eltern sind weniger schlimm. Der 1940er Satan würde diese Karte z.B. den Eltern des Opfers zuspielen um es so auszugrenzen, zu isolieren und dann in der Psychiatrie zu "behandeln". Use Case: Behavioral Science, Schafe zu den alten Glupscher, Satane zu den jungen Schafen (m7,m8 card) += Automatic Behavior Recognition mit Soziopsychologie-Designpattern und Opfern mit gleichaltrigen erträglichen Kolleg/innen helfen.

## To force others to do your work (Pirates of the Carebbean II) — m132

Inventor: xxxxx **Year: ~????**

In Pirates of the Carebbean 2 there is a scene where the lost pirates play for fewer years of service. This parable is promoted also in the real world. To quote Jack: "The law is in favour for an oppressor that is criminal". For example a criminal or a pedophile father that eg. rapes his daughter and uses eg. his son as a scapegoat. (German: "Fremdspurlegung"). This way the criminal father would win time to do more crimes while the scapegoat would be naked to the justice system, would face prison, mental institution and wastes a lot of his time. m72 card makes this quite easy for the older people. We guess the CIA suggested the combination of m72 && m132 to all the older people and just a few could resist. The CIA owned people would get support by other sinners and the CIA. With NSA BigData and 100 Years Dataretention it's eesay to blackmail and abuse them (m74). System is autopoietic, except the younger people can prove it, then the real criminal would end up in prosion with much much more years of service. The old people would not hesistate to kill innocent whistleblowers (m46). Eg. the kids movie "caspar" unfortunately even canonizes that. So watchout for Parents that promotes or even forces c04 card, it's not a real crime but it is some sort of satans starter kit

guilty conscience driven mind control — m86

Inventor: xxxxx **Year: ~????**

Every Morning when i stand up there are new loop-recorder patterns and LRU-Card Patterns played in my appartement (with eg t19). they try to overlay what i say yesterday, my imperatives, my maximes, they would like to destroy my world view to feel less guilty? The PsyOP let the 1960s do sins and told them that ok, but we can show, that they are not only killing autistic people. so they rewrite what i said the day before for not feeling that bad. unknown: they even pay for. Antagonizing worldviews. I question myself, why they dont just leave us alone? unknown: warning to all the honest sheeps, they want to make you guilty too (girls mos2, boys rage and mos3). i mean the circumstance that they are using manipulative techniques would imply that they know they are wrong. maybe they just protect the kids they rape or want to make them rape younger too for not feeling to guilty, dogmenraum, illegal paedo snowball system, a sin you swallow for the rest of your live, freshmeat
